Great to have you with us!

- Audience is muted during the presentation
- Only the presentation is recorded, not the chat or Q&A
- Ask questions in the chat anytime or live during Q&A
- All questions — including unanswered ones — will be anonymised and answered in a post-event report (www.frdn.be)
- The session ends strictly on time

International Love Data Week 2026

- The following presentation is part of our LDW-programme
- The output of all FRDN-hosted sessions will become available at www.frdn.be

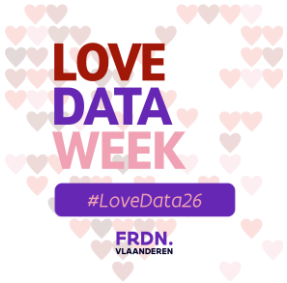

GHENT UNIVERSITY

How to Find a Repository, Zenodo, and Zenodo Communities

Kevin Leonard

Ghent University

10 Feb 2026

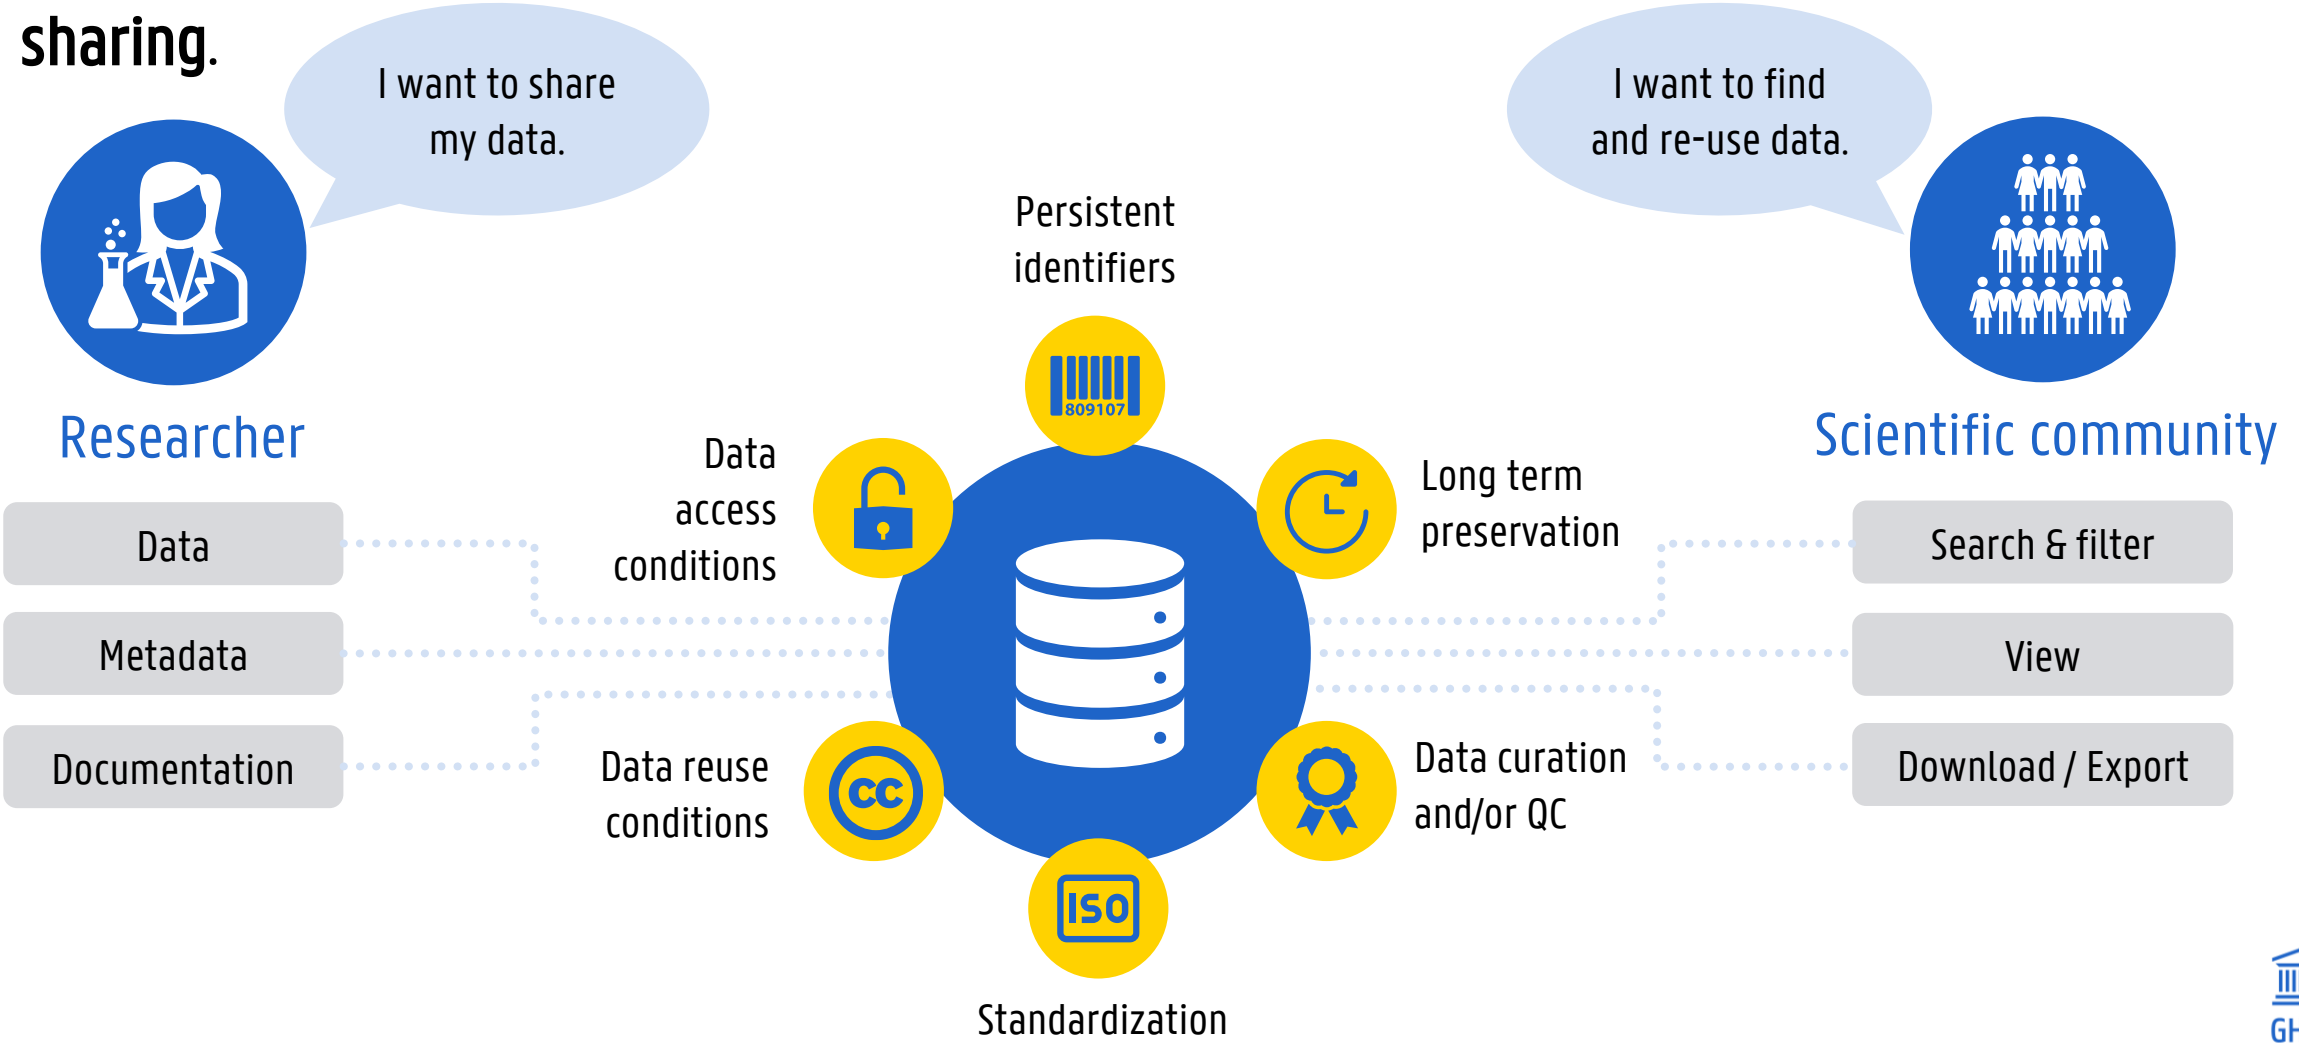

Agenda

- How do you find the data repository that is right for you?
- What is Zenodo and when should I use it (and when shouldn’t I)?
  - Features, practical considerations, limitations
- How do I publish my research in Zenodo?
  - Demo
- Zenodo Communities
  - Ghent University Research Data Community
  - EU Open Research Repository

GHENT UNIVERSITY

What is a data repository?

A database infrastructure that collects, manages and stores data for **preservation** and **sharing**.

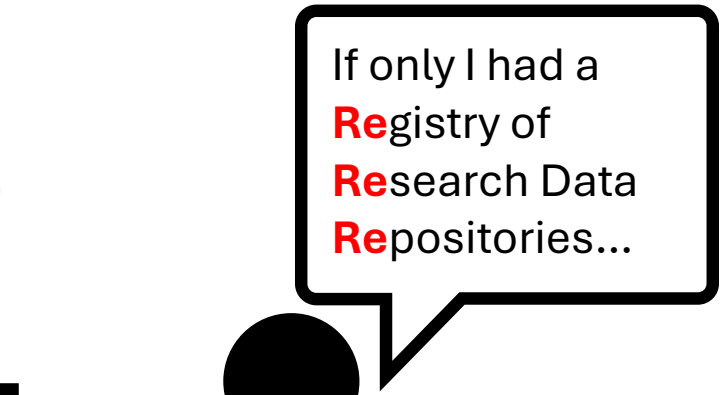

GHENT UNIVERSITY

So Many Repositories, So Little Time

Repository type(s)	disciplinary · institutional
Provider type(s)	dataProvider · serviceProvider
Country	Belgium

The Flanders Marine Institute (VLIZ) is a centre for marine and coastal research. As a partner in various projects and networks it promotes and supports the international image of Flemish marine scientific research and international marine education. In its capacity as a coordination and information platform, the Flanders Marine Institute (VLIZ) supports some thousand marine scientists in Flanders by disseminating their knowledge to policymakers, educators, the general public and scientists.

GREI Resources: Comparison Chart

TOPIC	DATAVERSE (HARVARD DATAVERSE REPOSITORY)	DRYAD	FIGSHARE	MENDELEY	OSF	VIVLI	ZENODO
Size Limits	2.5GB per file upload default (larger files accommodated on request) 2.5TB per user account (Harvard affiliates) 1TB per user account (Non-Harvard affiliates) Large data storage support: No limitation	2TB per total dataset package; 10GB per file (recommended)	20GB per published item (e.g., dataset) 20GB per file 500 files per item 50 versions per item 500 items per user account Figshare Plus offers up to 5TB of storage per dataset as well as higher limits for individual file sizes and number of files per dataset, subject to additional requirements.	Unlimited files capped at 10GB per dataset Unlimited datasets per user account Institutional users of Digital Commons Data: 100GB per dataset	50GB for projects and child/sub projects (public) 5GB for projects and child/sub projects (private) 5GB per file upload limit for native OSF Storage There is no limit imposed by OSF for the amount of storage used across add-ons (external storage providers authenticated by the user) connected to a given project.	Up to 4TB of total data Reach out to support@vivli.org for options of datasets greater than 4TB. See the Vivli Share Data webpage for more information	50GB per record 100 files max per record One-time quota up to 200GB for a single record Fair usage limits apply (i.e., not unlimited 50GB datasets) See this Zenodo FAQ for more information

GHENT UNIVERSITY

GHENT UNIVERSITY

What is Zenodo?

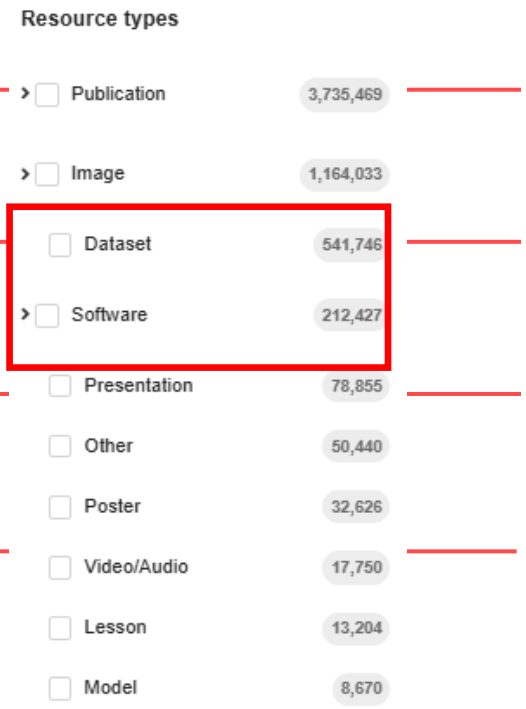

Developed and maintained by CERN since 2013

Safe, long-term availability

Suitable for all resource types

Free, instant record creation

Search and filter options, keywords

Holmes, K., Smith, T., Gonzalez Lopez, J. B., Carson, M., Gonzales, S., Nielsen, L. H., & Go, P. (2024). Use Cases_Zenodo. Zenodo. https://doi.org/10.5281/zenodo.12212654

GHENT UNIVERSITY

Why should I use Zenodo?

Repository Essentials

- Persistent Identifier (DOI)
  DataCite metadata
- Data reuse conditions
- Data access conditions
- Long-term preservation

Beginner-Friendly

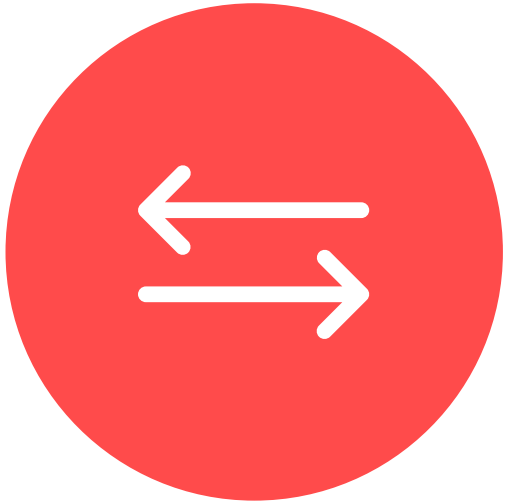

- Communities
  Curation
- Editable metadata
- 30 Day Edit Period
- Versioning
  Version DOIs

Expert Features

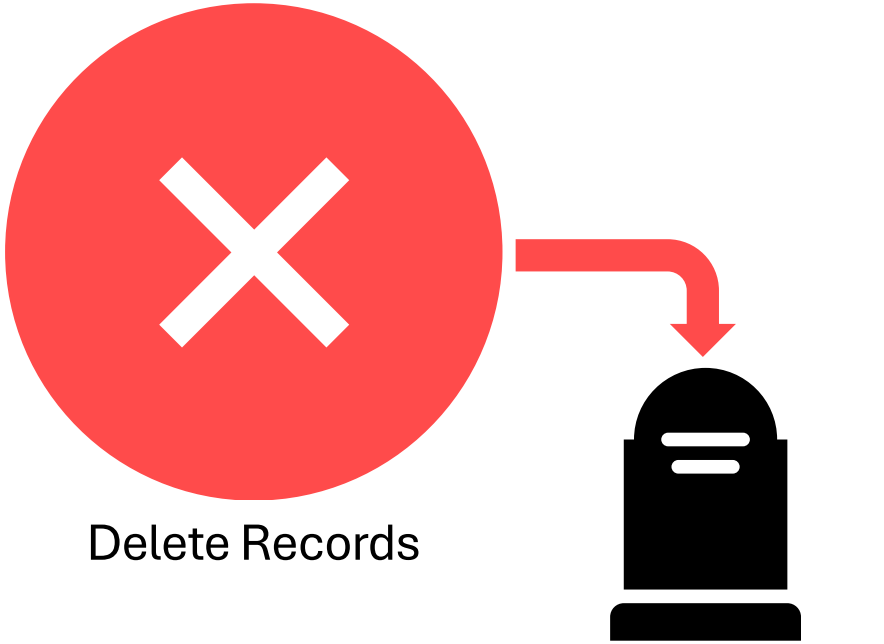

- Integration with GitHub, ORCID, OpenAIRE
- REST API
- Private links
- Access requests

GHENT UNIVERSITY

New to Zenodo: First 30 Days

Modify Files

Delete Records

Tombstone page

GHENT UNIVERSITY

When is Zenodo not right for me?

Large datasets: Limit of 50GB* / 100 (unzipped) files
Zenodo does not consider it fair usage to:

- Divide a single large dataset into many records to circumvent the upload limit
- Upload a very large number of records

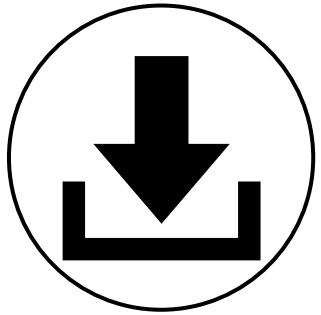

Sensitive Personal Data: “Zenodo is an open dissemination research repository”
Zenodo does not advise use of its platform for sensitive personal data unless:

- The data are anonymized
- Consent was acquired to share the data in their current form

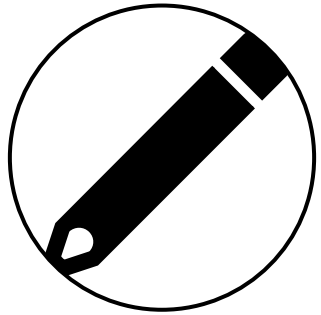

GHENT UNIVERSITY

HOW TO SHARE DATA IN ZENODO?

UPLOAD

- Sign-in using ORCID
- Add your data package
- Zip archive

DESCRIBE

- Reusable for others
- Link to related works
- Open and restricted access
- Add funding info

PUBLISH

- Instantly available*
- DOI: citable

EXAMPLE OF A ZENODO RECORD

Published December 7, 2019 | Version v1

Dataset Open

Archaeological bitumen from Tell Abraq - GC-MS & d13C data

Thomas Van de Velde[1]

Show affiliations

This dataset belongs to a research that was carried out on bitumen excavated at Tell Abraq, a Bronze Age period site located in the United Arab Emirates.

Several bitumen samples from various contexts were sampled and subjected to both GC-MS and Stable Carbon Isotope Analysis.
This dataset holds:
-Measured d13C values
-GC-MS Raw Data (registered by Agilent Software)
-Peak surfaces and molecular ratios (both .xlsx and .csv format, both are identical)
-Photos linked to the samples

ZENODO RECORD: FILES

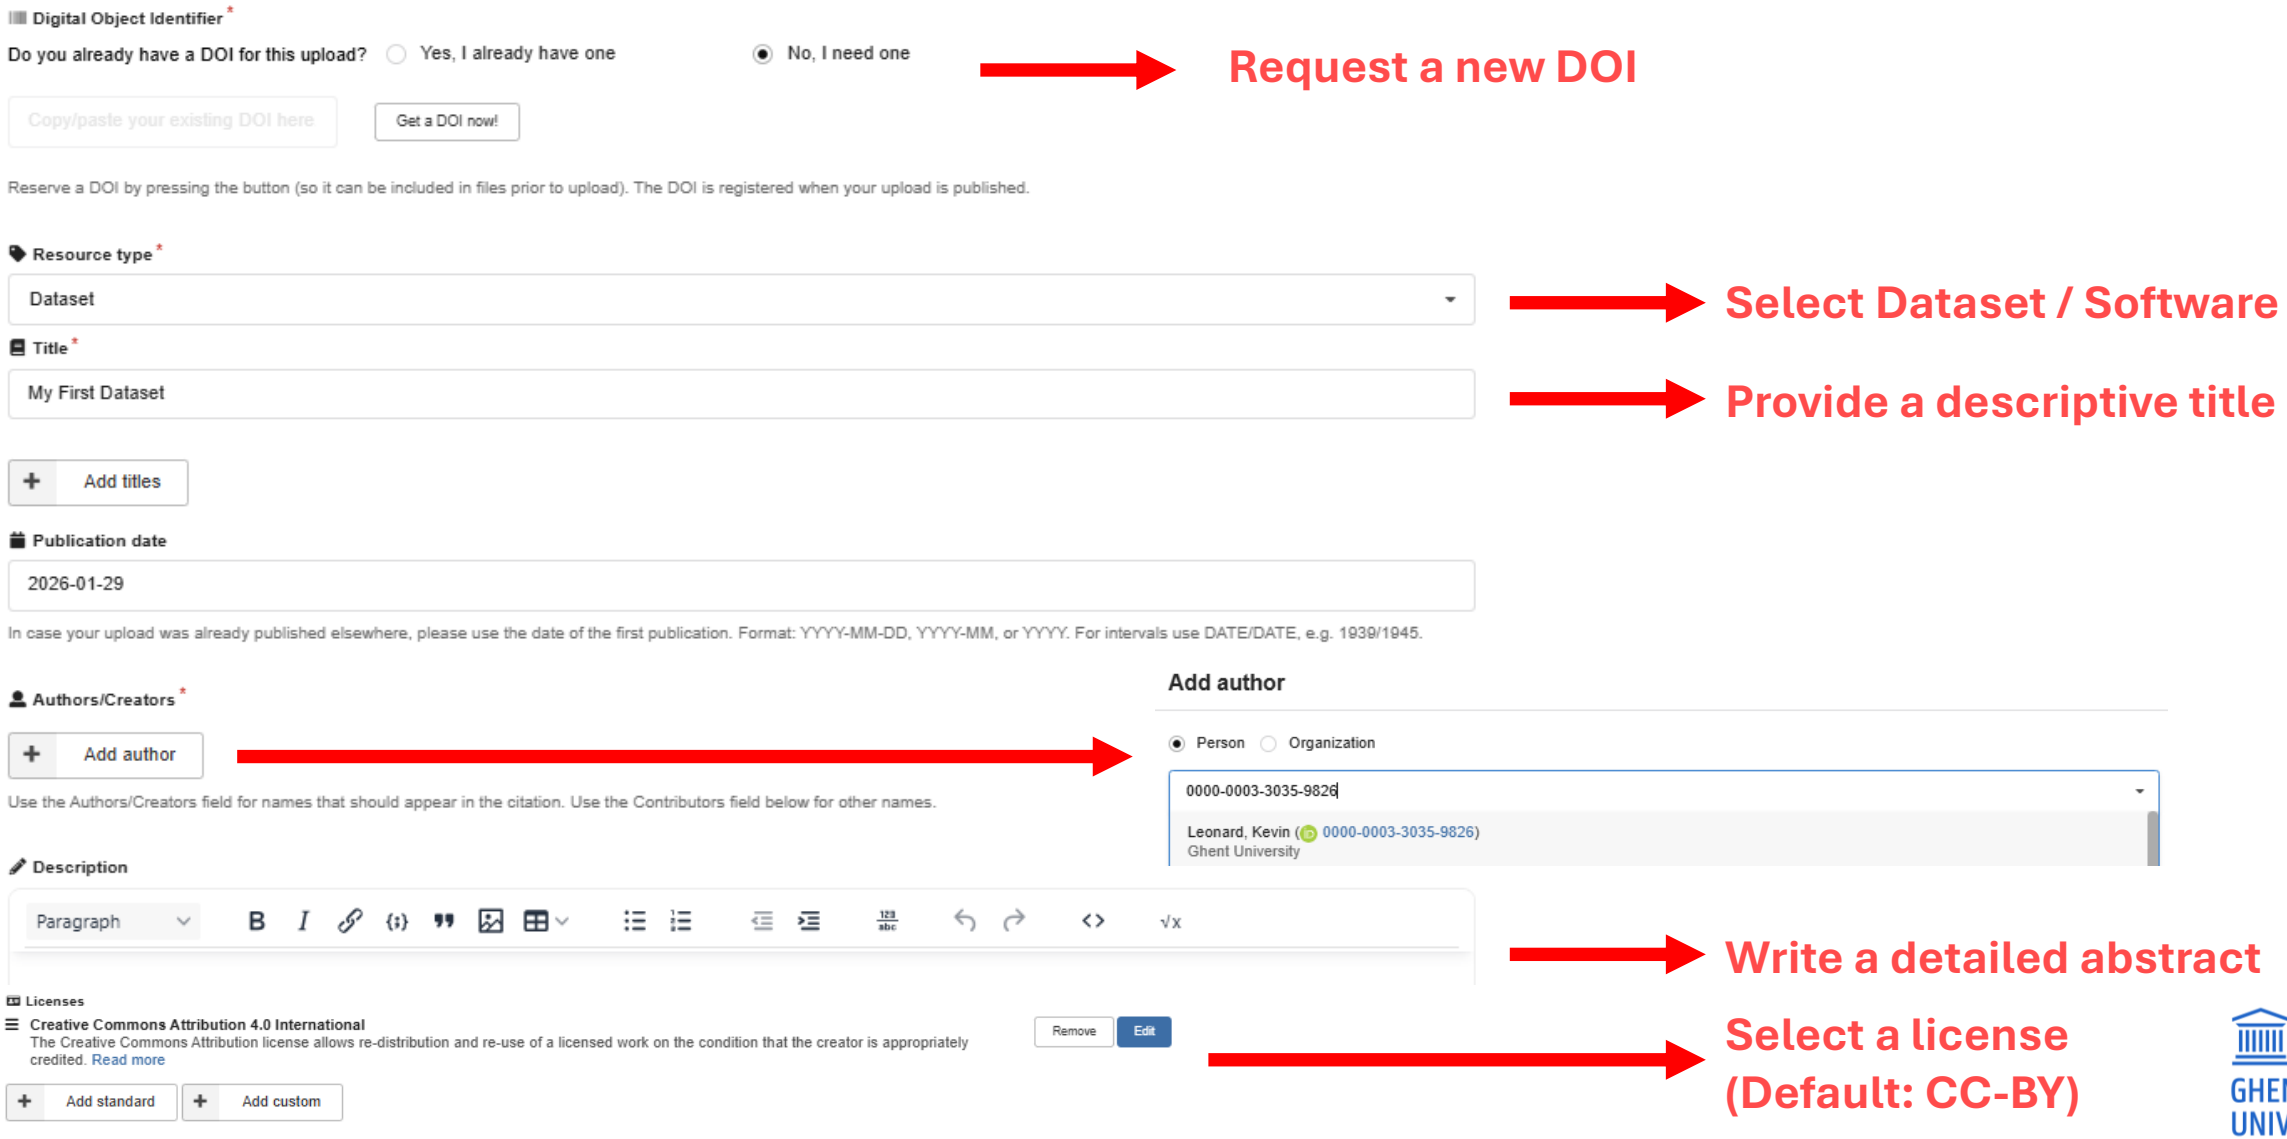

GHENT UNIVERSITY

ZENODO RECORD: DETAILED METADATA

- Basic information
- Recommended information
- Funding
- Alternate identifiers
- Related works
- References
- Software
- Publishing information
- Conference
- Domain specific fields

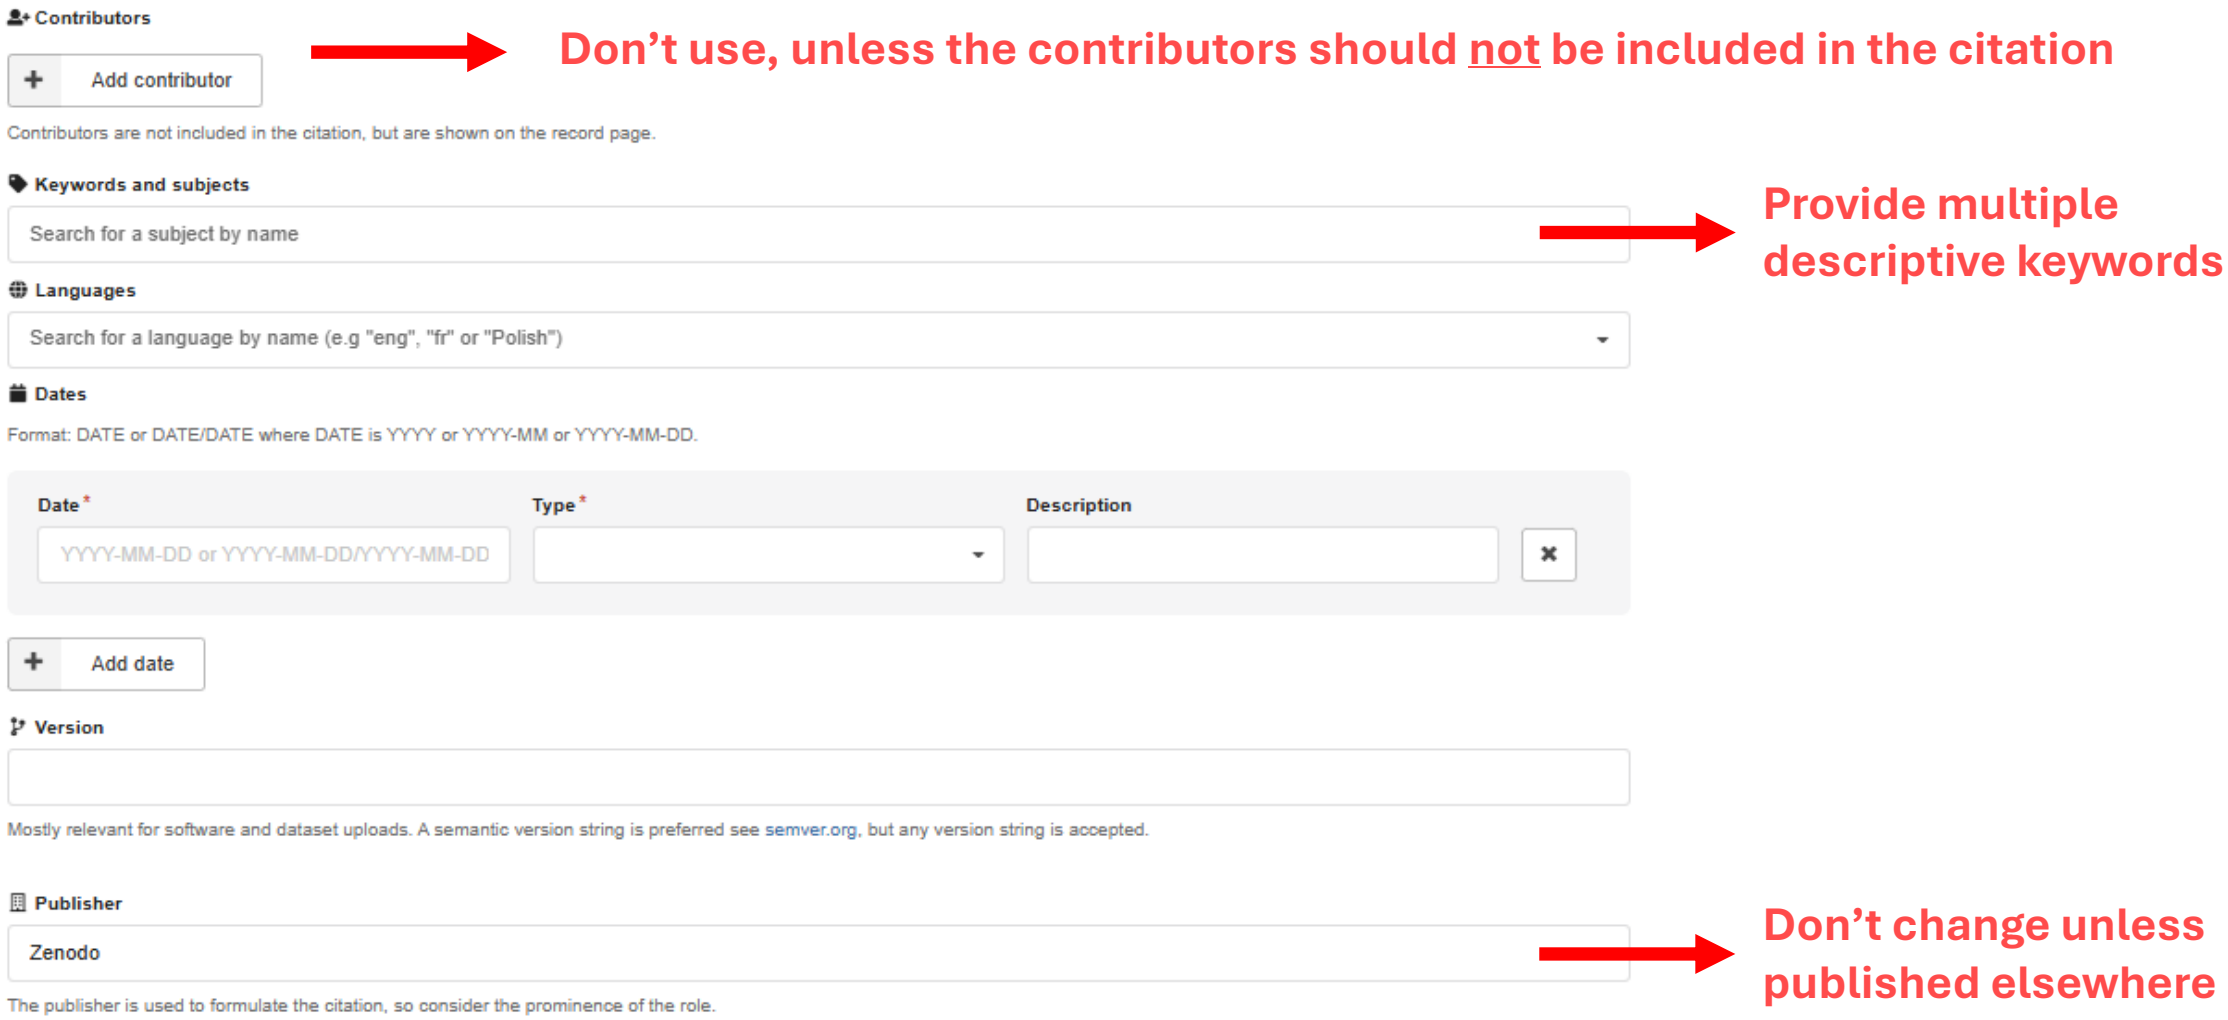

GHENT UNIVERSITY

Basic Information

GHENT UNIVERSITY

Recommended Information

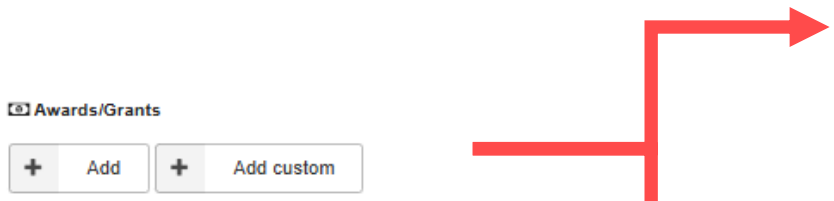

Don't use, unless the contributors should not be included in the citation

Provide multiple descriptive keywords

Don't change unless published elsewhere

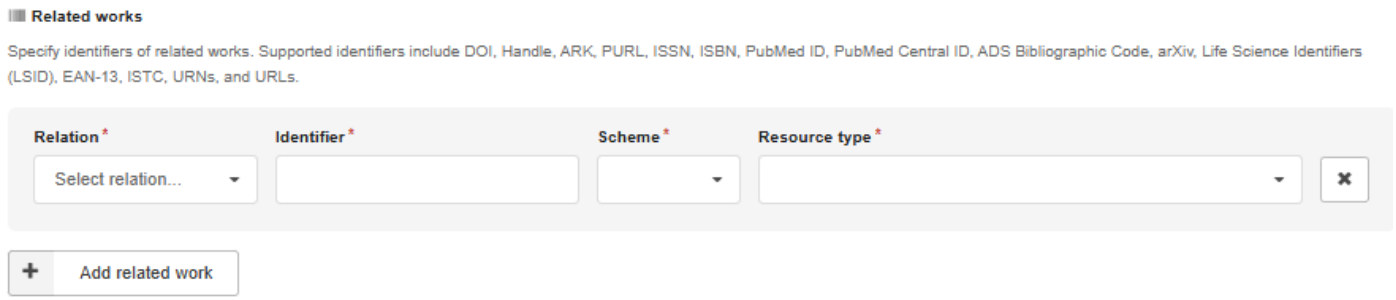

GHENT UNIVERSITY

Linking Outputs: *Funding* and *Related Works*

Search for and select an award/grant from the European Commission

Add custom funding using the funder's ROR ID

Link to all relevant publications, datasets, and software using the appropriate Relation Type:
Is supplement to...
Is compiled by...

GHENT UNIVERSITY

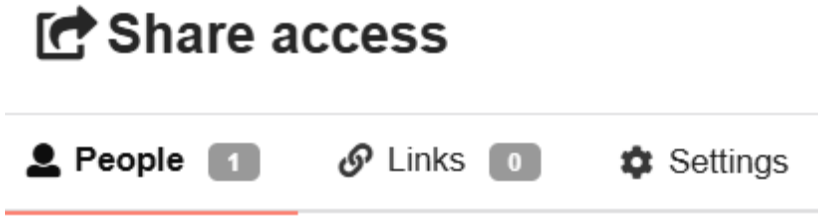

Other Sections

GHENT UNIVERSITY

ZENODO RECORD: SHARE ACCESS

- Drafts can be shared:
  - Individually, through email (“People”)
    - Useful for sharing with co-creators
  - Broadly, through links (“Links”)
    - Useful for sharing with reviewers
- Published restricted records can be shared
  - Through access requests (“Settings”)

GHENT UNIVERSITY

ZENODO DEPOSIT CHECKLIST

Community
- ❑ Ghent University Research Data community + any other relevant communities
- ❑ Check community deposit policy

Data package Files
- ❑ Use open, sustainable formats
- ❑ Deposit zip files to maintain folder hierarchy

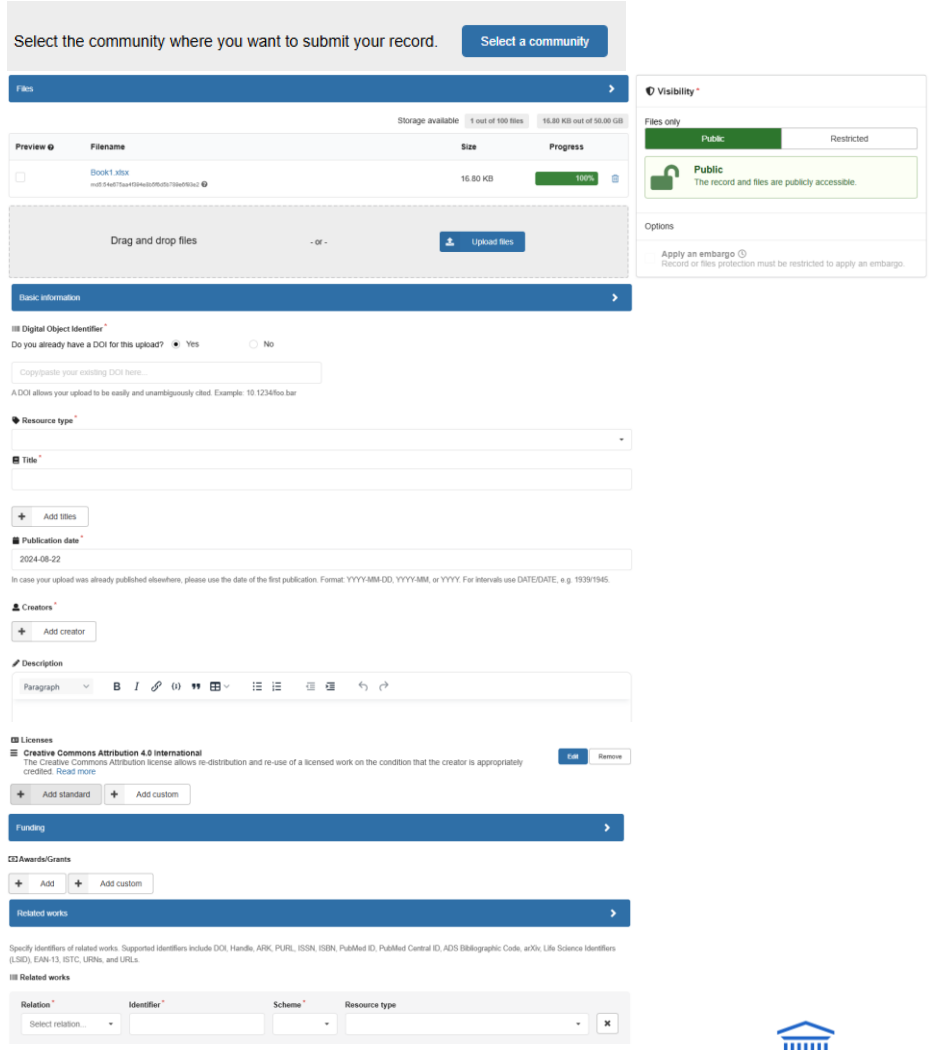

People and Affiliations
- ❑ Include all people that contributed to the dataset as Creators, not Contributors
- ❑ Include ORCIDs and institutional affiliations (ROR)

Description
- ❑ Title: Short, declarative, descriptive, different from the title of the article
- ❑ Abstract: Describe the content of the dataset, not the related article. Not the same as a README
- ❑ Keywords: As many as possible, make sure they appear as distinct items

Access and License
- ❑ Access: Open, embargoed (specify an embargo period), restricted access (specify conditions under which you approve access)
- ❑ License: Default to CC-BY 4.0, use standard licenses whenever possible

Funding
- ❑ Include grant information (Horizon, FWO)
- ❑ Horizon Europe projects: automatic inclusion in EU Open Research Repository community

Related works
- ❑ Link to related articles, code, and datasets using persistent identifiers
- ❑ Common RelationTypes: *Is supplement to* (articles), *Compiles* (data), *Is compiled by* (software)

OSF | Zenodo_deposit_checklist.pdf

GHENT UNIVERSITY

ZENODO COMMUNITIES

Collect related works

Allow for curation of community contents

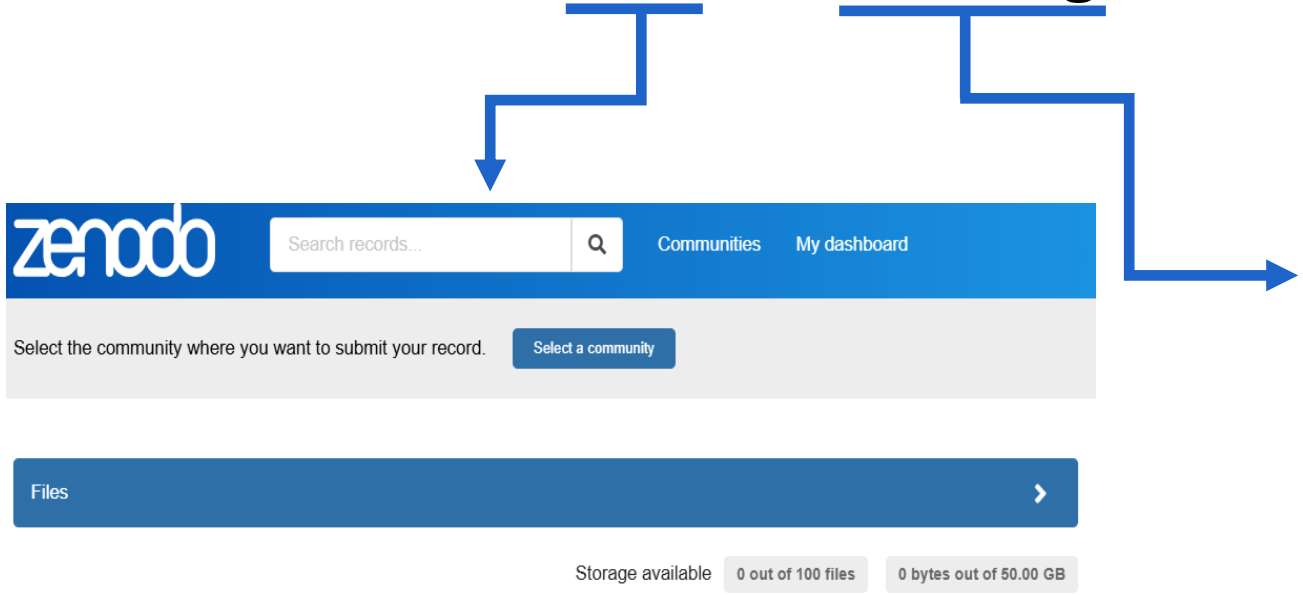

Available to everyone

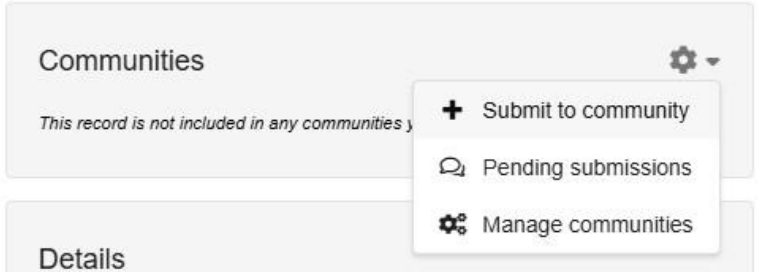

Records can belong to multiple communities

GHENT UNIVERSITY

GHENT UNIVERSITY RESEARCH DATA COMMUNITY

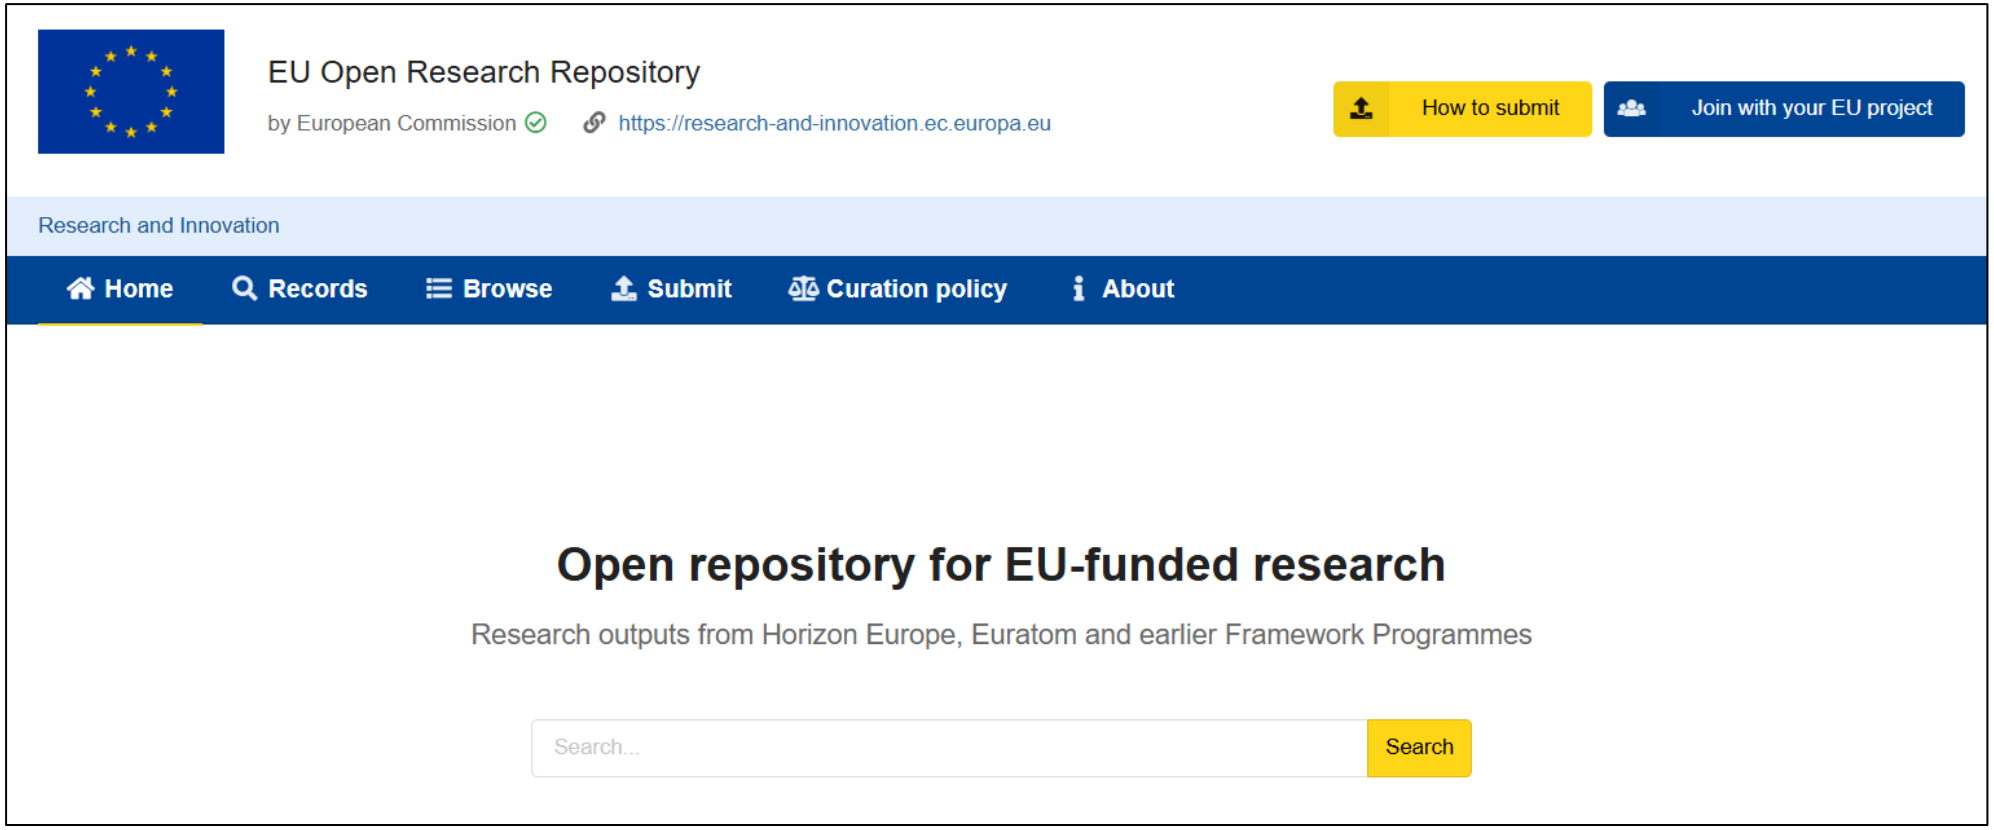

- Curation services
- Accepts research data and software
- Joinable with new and existing records

GHENT UNIVERSITY

EU OPEN RESEARCH REPOSITORY

https://zenodo.org/communities/eu/

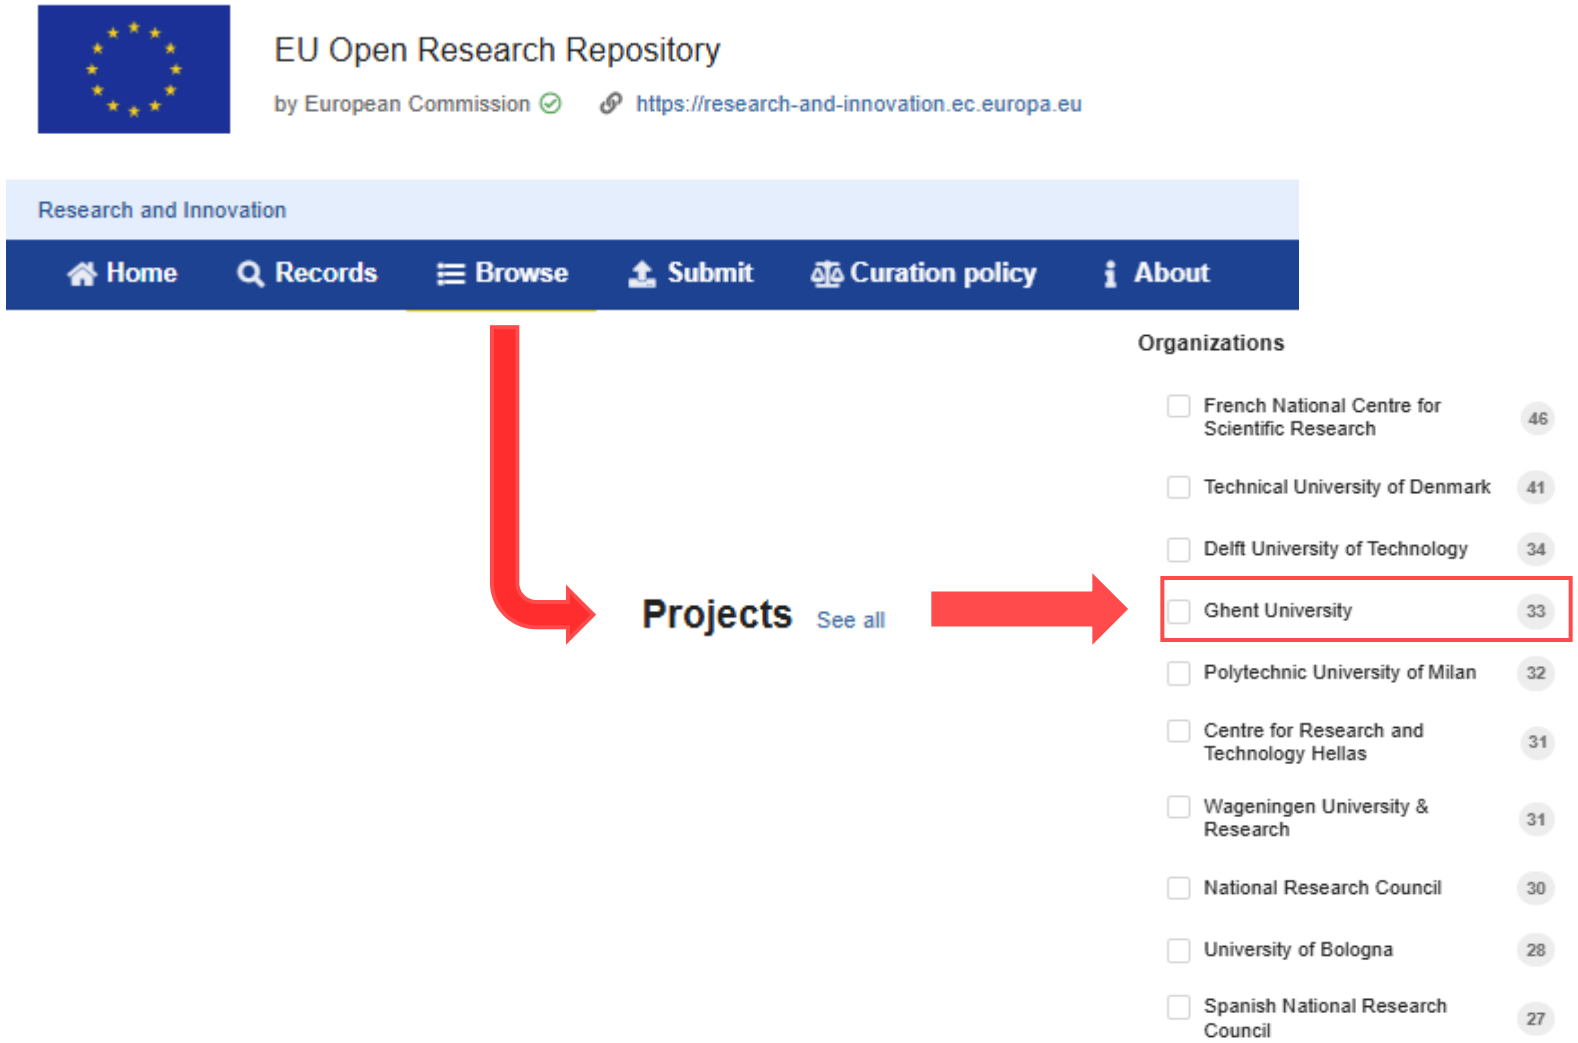

GHENT UNIVERSITY

EU OPEN RESEARCH REPOSITORY

- Minimal metadata curation from CERN
  - Automated curation (all records):
    - MUST:
      - Licence compliant with Horizon OS requirements (CC-BY, CC0, or equivalent)
      - 1+ EC grant
    - SHOULD:
      - PIDs for Creators and Affiliations
      - 1+ field of science
      - Use open or scientific file formats
  - Manual curation (per community) by project members
- Increase in per record storage capacity (50GB → 200GB)
- Guaranteed compliance with HORIZON Europe requirements
- Integrated with OpenAIRE to facilitate reporting in the EC Participant Portal
