EVERYONE ON THE ROAD TO OPEN SCIENCE

GHENT
UNIVERSITY

OPEN ACCESS TO PUBLICATIONS IN HORIZON EUROPE

GHENT UNIVERSITY

AIM

To optimise the impact of publicly-funded scientific research, both at European (FP7, Horizon 2020, Horizon Europe) and Member State level

Results of publicly-funded research should be disseminated more broadly and faster, for the benefit of researchers, innovative industry and citizens.

All beneficiaries must deposit their peer-reviewed publications to ensure open access

KEY IMPACT PATHWAYS INDICATORS

This impact assessment accompanies the Commission proposal for Horizon Europe, the 2021-2027 EU Framework Programme for Research and Innovation, which will succeed the current Programme, Horizon 2020 (active between 2014-2020), and the proposal for the 2021-2025 Research and Training Pro-gramme of the European Atomic Energy Com-munity (Euratom Programme)

GHENT
UNIVERSITY

3 Message: Horizon Europe opens up science, as shown by research outputs shared openly, re-used and stimulating new transdisciplinary/trans-sectoral collaborations[5].

Shared knowledge	Knowledge diffusion	New collaborations	Fostering diffusion of knowledge and Open Science
Share of FP research outputs (open data/ publication/ software etc.) shared through open knowledge infrastructures	Share of open access FP research outputs actively used/cited after FP	Share of FP beneficiaries having developed new transdisciplinary/ trans-sectoral collaborations with users of their open FP R&I outputs	

Data needs: Identification of research outputs (in particular publications and research data) co-funded by the FP through the insertion of a specific DOI for the FP when publishing or sharing openly (e.g. OA journals/ platforms (publications) and open FAIR repositories (data)), allowing follow-up tracking of open access performance in terms of active use/citations and collaborations.

Evolution of the policies across the FPs

2008

FP7

Open access

OA Pilot for publications

2014

H2020

Open access

Mandatory OA to publications

+

ORD/RDM (pilot in 2014; mainstreamed in 2017)

2021

Horizon Europe

Open science

Open access to publications and data ensured (exceptions) –FAIR data-DMP-long-term preservation

Open science practices promoted and encouraged (incentives+obligations)

Sufficient IPR to be maintained

European Commission

Requirements open access to scientific publications

The beneficiaries must ensure **open access to peer-reviewed scientific publications** relating to their results. In particular, they must ensure that:

- at the latest at the time of publication, a machine-readable electronic copy of the published version, or the final peer-reviewed manuscript accepted for publication, is **deposited in a trusted repository** for scientific publications
- **immediate open access** is provided to the deposited publication via the repository, under the latest available version of the Creative Commons Attribution International Public Licence (**CC BY**) or a licence with equivalent rights; for monographs and other long-text formats, the licence may exclude commercial uses and derivative works (e.g. **CC BY-NC, CC BY-ND**) and
- **information** is given via the repository about any research output or any other tools and instruments needed to validate the conclusions of the scientific publication.

GHENT
UNIVERSITY

METADATA

provide information at least about

- **Publication**: author(s), title, date of publication, publication venue;
- Horizon Europe or Euratom **funding**: grant project name, acronym and number
- **licensing** terms
- **persistent identifiers** for the publication, the authors involved in the action (e.g. ORCID) and, if possible, their organisations and the grant

Beneficiaries (or authors, where the case)

- must **retain sufficient intellectual property rights** to comply with their open access requirements.
- grant, insofar as possible, non-exclusive licenses to publishers.

Adequate Intellectual Property (IP) management , in particular copyright, is at the core of open access and open science

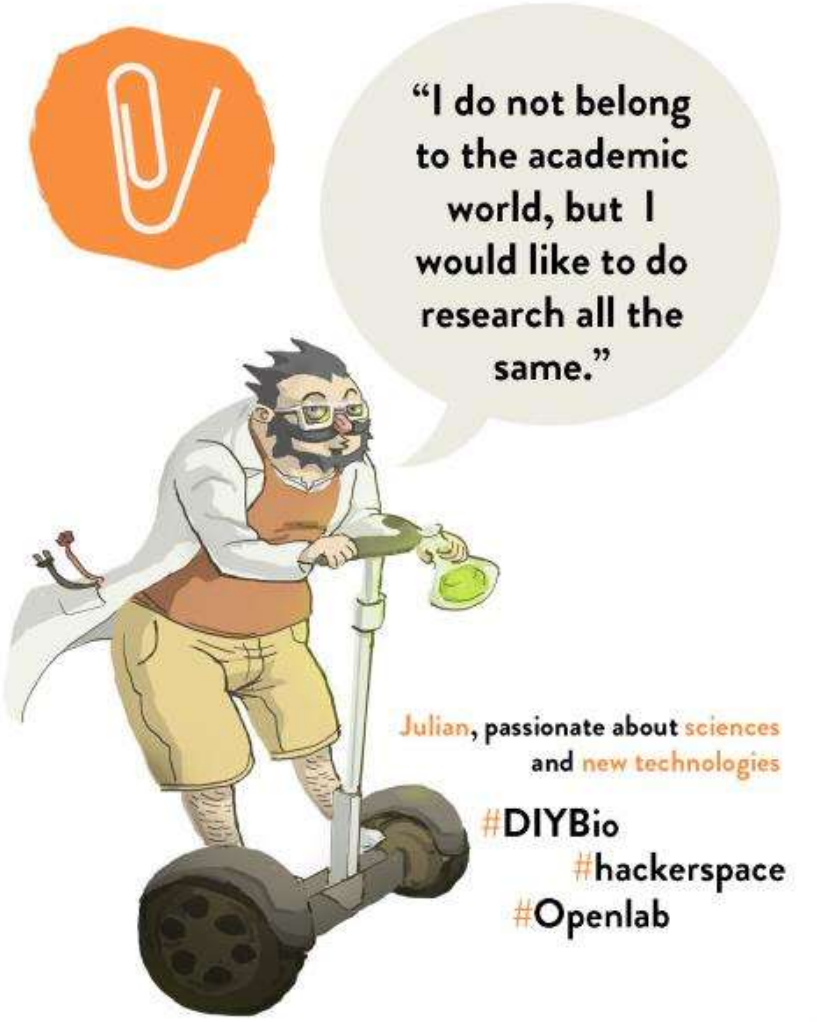

GHENT UNIVERSITY

REPORTING/MONITORING OF PROJECTS AND GUIDANCE

- Extensive reporting of open science practices:
  - structured reporting of requirements regarding open access
  - free text reporting of encouraged open science practices
- Monitoring by project officers and reviewers in periodic reviews

OPEN REVISITED

GHENT UNIVERSITY

CC BY SA

Sharing ≠ open

GHENT
UNIVERSITY

Opendefinition.org

Open means anyone can freely access, use, modify, and share for any purpose (subject, at most, to requirements that preserve provenance and openness)."

GHENT UNIVERSITY

How

"Self archiving": the author archives a publication in an openly available repository. This is also known as "green road to open access".

Publish in an Open Access Journal, a freely available electronic journal. This is also known as "gold road to open access".

"Hybrid": pay APC to open an article in a subscription journal

Publish in another Open Access venue / platform

GHENT
UNIVERSITY

GREEN OA

= Self archiving

- In an open repository / open archive
  - Institutional / disciplinary: always scholarly
  - Interoperable, open standards and protocols
  - Find a repository: Directory of Open Access Repositories
- Deposit a version of your publication and open
  - Which version? Sherpa Romeo
- Add links, eg project info, data sets

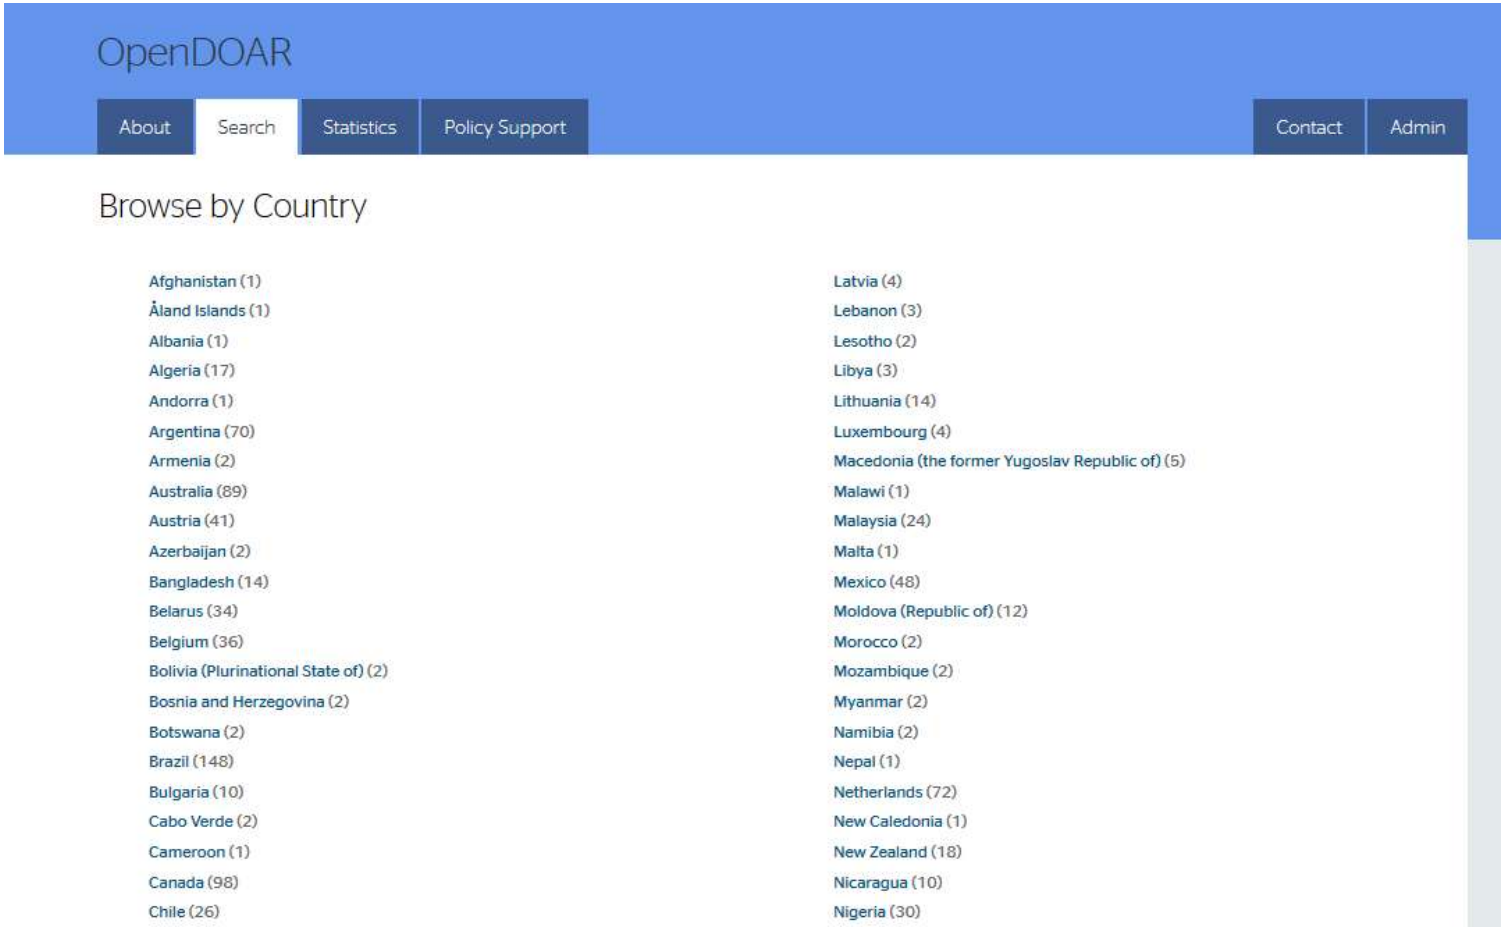

GHENT UNIVERSITY

Personal websites and databases, publisher websites, as well as cloud storage services (Dropbox, Google drive, etc) are not considered repositories.

Academia.edu, ResearchGate and similar platforms do not allow open access under the terms required and are not considered repositories.

16 Principles of Transparency and Best Practice in Scholarly Publishing

https://doaj.org/bestpractice

GHENT UNIVERSITY

Principles of Transparency

1. **Website**
   A journal's website, including the text that it contains, shall demonstrate that care has been taken to ensure high ethical and professional standards. It must not contain information that might mislead readers or authors, including any attempt to mimic another journal/publisher's site. An 'Aims & Scope' statement should be included on the website and the readership clearly defined. There should be a statement on what a journal will consider for publication including authorship criteria (e.g. not considering multiple submissions, redundant publications) to be included. ISSNs should be clearly displayed (separate for print and electronic).
2. **Name of journal**
   The Journal name shall be unique and not be one that is easily confused with another journal or that might mislead potential authors and readers about the Journal's origin or association with other journals.
3. **Peer review process**
   Journal content must be clearly marked as whether peer reviewed or not. Peer review is defined as obtaining advice on individual manuscripts from reviewers expert in the field who are not part of the journal's editorial staff. This process, as well as any policies related to the journal's peer review procedures, shall be clearly described on the journal's Web site, including the method of peer review used. Journal websites should not guarantee manuscript acceptance or very short peer review times.
4. **Ownership and management**
   Information about the ownership and/or management of a journal shall be clearly indicated on the journal's website. Publishers shall not use organizational or journal names that would mislead potential authors and editors about the nature of the journal's owner.
5. **Governing body**
   Journals shall have editorial boards or other governing bodies whose members are recognized experts in the subject areas included within the journal's scope. The full names and affiliations of the journal's editorial board or other governing body shall be provided on the journal's website.
6. **Editorial team/contact information**
   Journals shall provide the full names and affiliations of the journal's editors on the journal's website as well as contact information for the editorial office, including a full address.
7. **Copyright and Licensing**
   The policy for copyright shall be clearly stated in the author guidelines and the copyright holder named on all published articles. Likewise, licensing information shall be clearly described in guidelines on the website, and licensing terms shall be indicated on all published articles, both HTML and PDFs. If authors are allowed to publish under a Creative Commons license then any specific license requirements shall be noted. Any policies on posting of final accepted versions or published articles on third party repositories shall be clearly stated.
8. **Author fees**
   Any fees or charges that are required for manuscript processing and/or publishing materials in the journal shall be clearly stated in a place that is easy for potential authors to find prior to submitting their manuscripts for review, or explained to authors before they begin preparing their manuscript for submission. If no such fees are charged that should also be clearly stated.
9. **Process for identification of and dealing with allegations of research misconduct**
   Publishers and editors shall take reasonable steps to identify and prevent the publication of papers where research misconduct has occurred, including plagiarism, citation manipulation, and data falsification/fabrication, among others. In no case shall a journal or its editors encourage such misconduct, or knowingly allow such misconduct to take place. In the event that a journal's publisher or editors are made aware of any allegation of research misconduct relating to a published article in their journal, the publisher or editor shall follow COPE's guidelines (or equivalent) in dealing with allegations.
10. **Publication Ethics**
    A journal shall also have policies on publishing ethics. These should be clearly visible on its website, and should refer to: i) Journal policies on authorship and contributorship; ii) How the journal will handle complaints and appeals; iii) Journal policies on conflicts of interest / competing interests; iv) Journal policies on data sharing and reproducibility; v) Journal's policy on ethical oversight; vi) Journal's policy on intellectual property; and vii) Journal's options for post-publication discussions and corrections.
11. **Publishing schedule**
    The periodicity at which a journal publishes shall be clearly indicated.
12. **Access**
    The way(s) in which the journal and individual articles are available to readers and whether there are associated subscription or pay per view fees shall be stated.
13. **Archiving**
    A journal's plan for electronic backup and preservation of access to the journal content (for example, access to main articles via CLOCKSS or PubMedCentral) in the event a journal is no longer published shall be clearly indicated.
14. **Revenue sources**
    Business models or revenue sources (eg, author fees, subscriptions, advertising, reprints, institutional support, and organizational support) shall be clearly stated or otherwise evident on the journal's website. Publishing fees or waiver status should not influence editorial decision making.
15. **Advertising**
    Journals shall state their advertising policy if relevant, including what types of adverts will be considered, who makes decisions regarding accepting adverts and whether they are linked to content or reader behavior (online only) or are displayed at random. Advertisements should not be related in any way to editorial decision making and shall be kept separate from the published content.
16. **Direct marketing**
    Any direct marketing activities, including solicitation of manuscripts that are conducted on behalf of the journal, shall be appropriate, well targeted, and unobtrusive. Information provided about the publisher or journal is expected to be truthful and not misleading for readers or authors.

GHENT UNIVERSITY

OPEN ACCESS JOURNALS

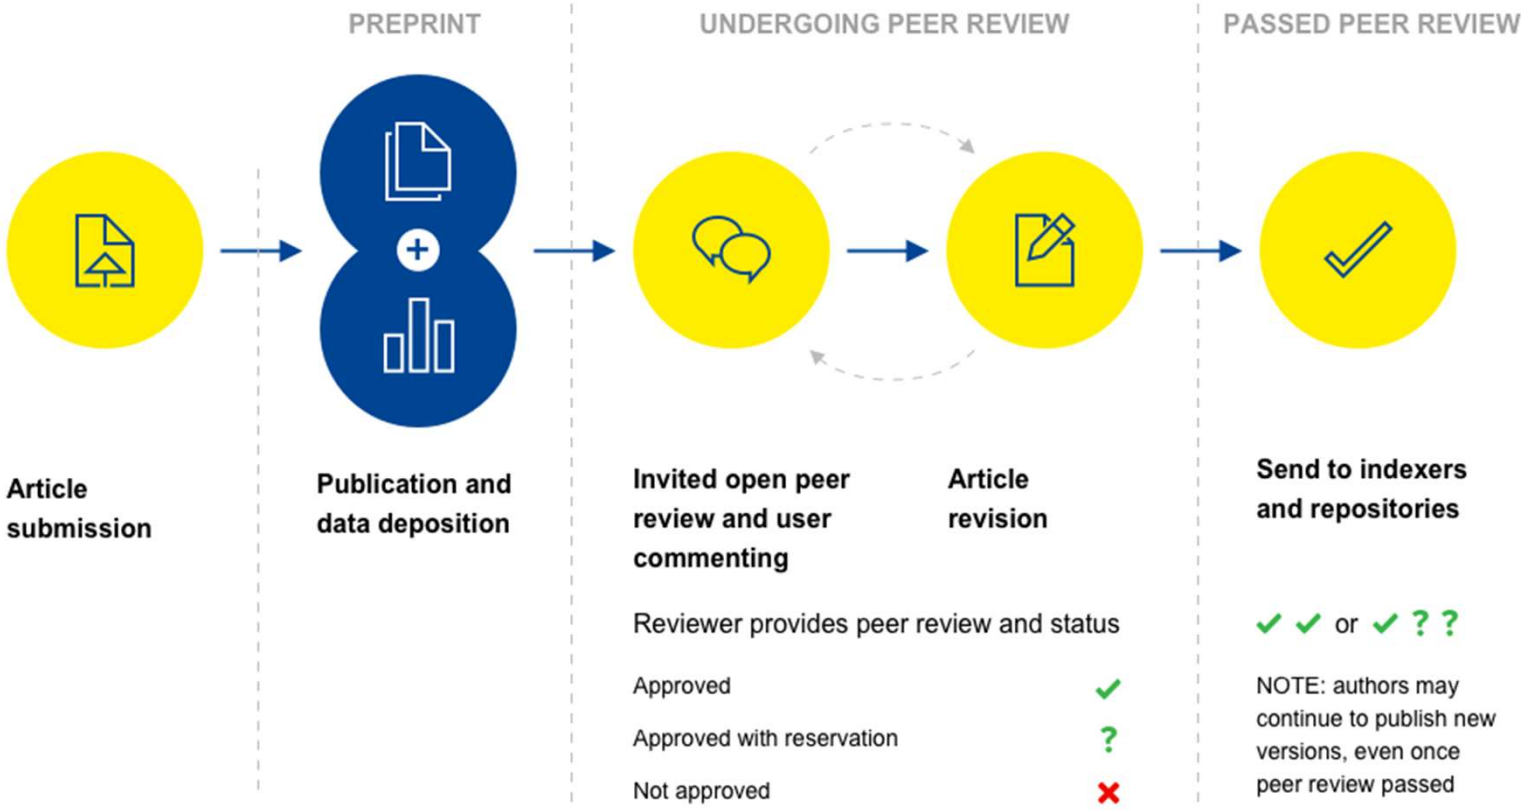

- Some open access journals charge an article processing charge (APC): this is an eligible cost.
- Some don't and are funded differently, e.g. by libraries, scholarly societies, … => free for reader and author

GHENT
UNIVERSITY

ORE: WHY A PUBLISHING PLATFORM?

- High quality, reliable and efficient **publishing venue** for EU research
- Venue where grantees can publish (also post grant) results, respecting their open access obligations
- To lead by example in operationalising open science principles within scientific publishing e.g. open peer review, early sharing of research, new generation indicators
- No cost to authors/beneficiaries i.e. non-APC platform
- Exploring sustainable open access publishing business models

PUBLISHING PROCESS

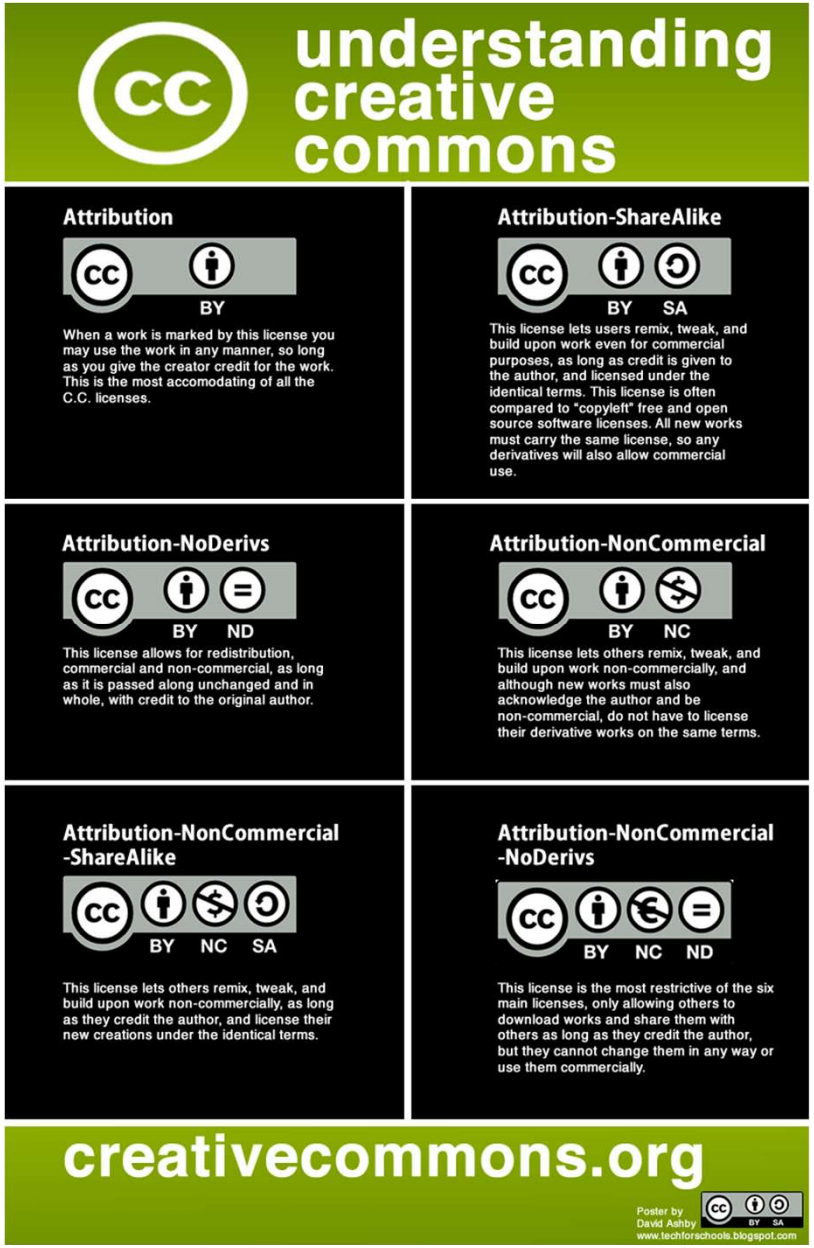

GHENT UNIVERSITY

OPEN LICENCES

Necessary to indicate permissions
Also machine-readable , API's

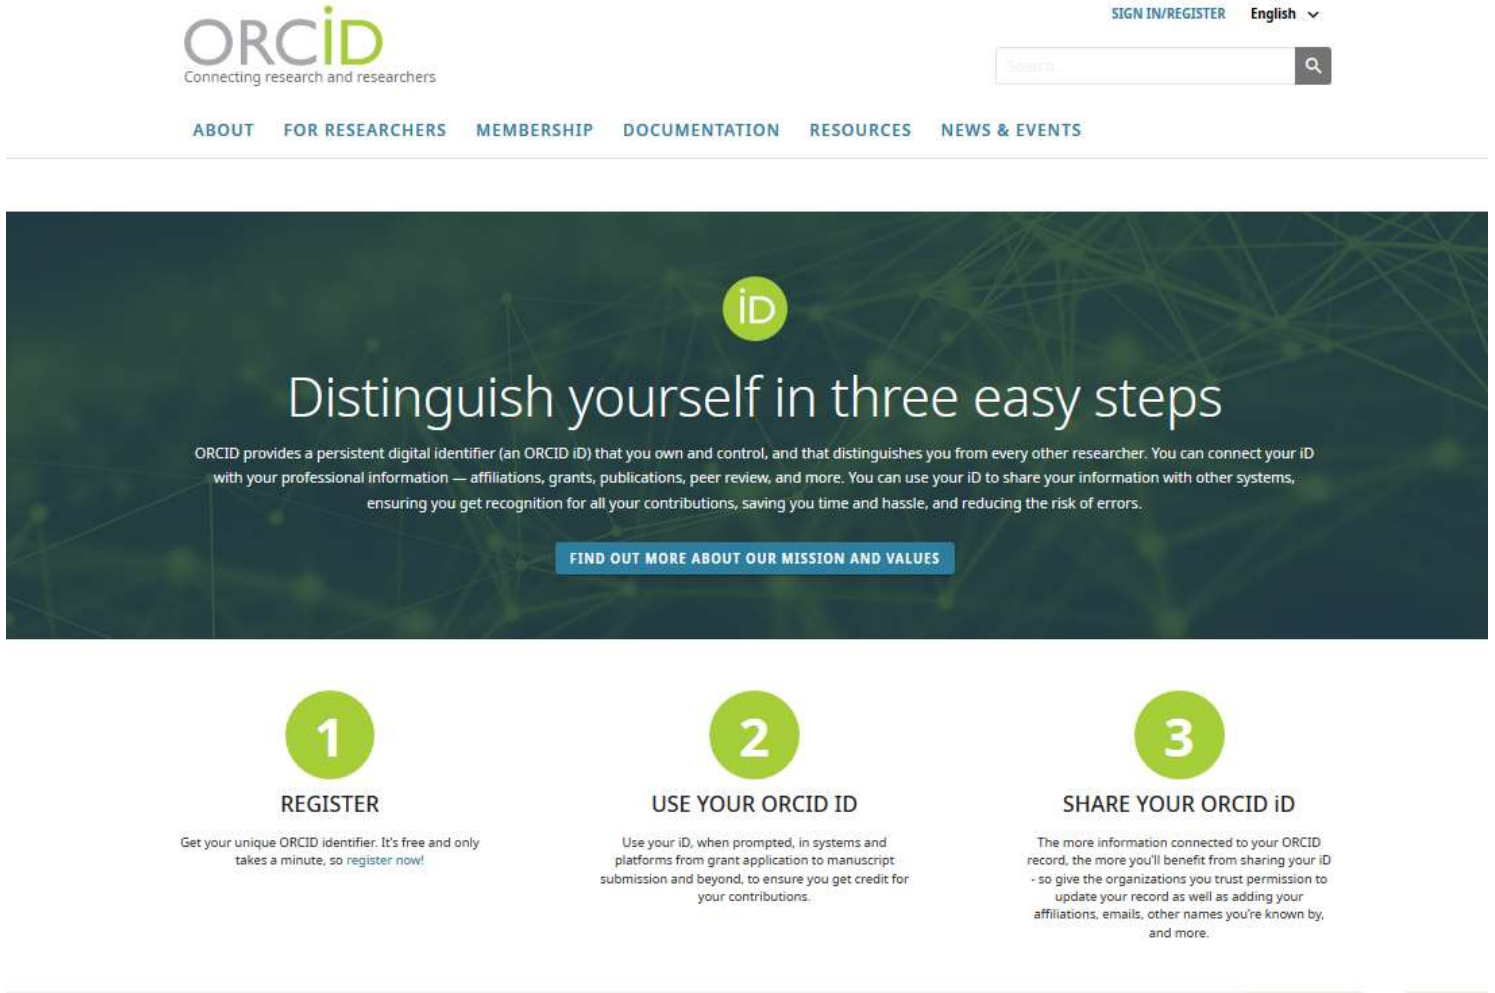

E.g. creative commons
- Since 2002
- Upfront
- Non-exclusive licence
- Only economic rights, not moral rights
- Conditions may apply

http://creativecommons.org/worldwide/be/
